Our Maternity Services
AMITA Health Alexian Brothers Medical Center, Elk Grove Village and AMITA Health Alexian Brothers Women & Children’s Hospital, Hoffman Estates

At our two hospitals, you’ll find the specialists you need, the expertise you expect, and compassionate care you can trust – close to home.

For Mom & Baby
Our hospitals offer you and your family a wonderful place to experience the miracle of birth.

You can take comfort in knowing that you’ll be surrounded by the latest technology, experienced physicians and labor and delivery staff ready to care for you, baby and the rest of your family during this very important time. Also featuring:

- Private rooms
- Pre-natal and newborn programs and services
- Labor and Delivery and Mother Baby Units
- An expanded Level III Neonatal Intensive Care Unit (NICU)
Finding the right doctor for your baby is important. Babies need frequent checkups, vaccines, and sometimes get sick. There’s no need to wait until you need a doctor to find the right one for your baby.

Call 855.367.5439 to speak to one of our advisers to help you find the right one today.

CN EmergiKids™

A separate, kid-focused emergency area located inside the emergency departments of AMITA Health Alexian Brothers Women & Children’s Hospital, Hoffman Estates and AMITA Health Alexian Brothers Medical Center, Elk Grove Village.

- Pediatric emergency physicians
- Pediatric nurses
- Kid-sized medical emergency equipment
- Priority attention for your child in a kid-friendly environment
- Prompt management of your child’s pain
- Access to care from over 100 pediatricians and 60 pediatric subspecialists

Getting Ready for Your New Baby

The birth of your baby is one of the most exciting times of your life. At AMITA Health Alexian Brothers Health System we want to get you started the right way! Each of our medical centers has a special care nursery and at our AMITA Health Alexian Brothers Women & Children’s Hospital we have a Level III Neonatal Intensive Care Unit for the tiniest newcomers. Both hospitals staff full time 24/7 neonatologists so that you are always in the best hands.

Information for Moms and Moms-to-be
Please visit AlexianBrothersHealth.org/NewMom and discover Pregnancy Central and The Newborn Channel. Here you will find clear and concise information regarding pre-pregnancy, pregnancy and birth; beautiful photos and videos; topical articles about motherhood; a glossary of commonly used terms; and much more. Plus, you can keep track of your baby’s development for all 40 weeks.

Postpartum Services
We offer many classes and programs to help you prepare for starting your family or adding a little addition.

- Lactation Consultant
- Breast Pump Rental
- Spanish Lactation/Pump
- Maternal Fetal Medicine
- Postpartum Depression

Maternal Fetal Medicine
Our experienced team can be trusted with the most complicated cases. Perinatologists, nurses, ultrasonographers, genetic counselor, social worker, neonatologists, pediatric cardiologist and other pediatric specialists collaborate with physicians and families to provide an individualized and comprehensive plan of care for each patient.

Lee C. Yang, DO

AMITAHealth.org/Pediatrics
Nine Months and Counting – Classes Offered

We offer many classes and programs to help you prepare for starting your family or adding a little addition.

Call 1.855.FOR.KIDZ (1.855.367.5439) to schedule a tour of our state-of-the-art birthing facilities or register for classes. You can also take a virtual tour at AMITAHealth.org/Maternity.

Baby Care Basics (recommended at 6 months)
Expectant parents learn how to feed, dress and hold their new baby, and identify normal newborn characteristics and behaviors. The class also discusses infant safety and adjusting to life at home with a newborn.

Breastfeeding Class (recommended at 8 months)
A certified lactation consultant teaches the basics of how to begin breastfeeding your baby, and how to ensure breastfeeding success in the weeks following your baby’s birth.

Car Seat Safety
A certified car seat technician educates parents, grandparents and care providers on car seat safety and legal requirements. Please bring your car seat to class for hands-on training.

Prepared Childbirth Classes
Prepare physically and emotionally for the birth of your baby. Learn coping techniques to use in labor, such as breathing and relaxation. Learn about cesarean-section births, medications, epidural pain management and induced labor.

Sibling Preparation Class
Help a big brother or sister prepare for the adjustments that a new baby at home will bring.

And much more...

For more information or to register, call 1.855.FOR.KIDZ (1.855.367.5439) or visit AMITAHealth.org/Maternity.
¡Hablamos español!

Ofrecemos muchas clases y programas en español, y también podemos ayudarle a encontrar consultorios de pediatras, obstetras o médicos de familia que sean bilingües. Pregúntenos acerca de las clases para partos y visitas guiadas de nuestro hospital, de los servicios de referencias y para hacer citas con médicos. Para comunicarse con un representante que hable español por favor llamar al 1.855.FOR.KIDZ (1.855.367.5439).

Pediatric Inpatient Services

We offer a dedicated team of in-house physicians that collaborate with your primary care physician, and over 60 subspecialists to provide comprehensive care to our pediatric patients.

Many of our subspecialists have convenient office hours at AMITA Health Alexian Brothers Women & Children’s Hospital in Hoffman Estates, and AMITA Health Alexian Brothers Medical Center or the AMITA Health Alexian Brothers Women & Children’s Hospital Pediatric Outpatient Center, Elk Grove Village.

Pediatric Hospitalists and Critical Care Physicians

Our specially trained physicians work closely with many hospital areas including the pediatric unit, labor and delivery, newborn nursery, emergency department, NICU and PICU, to ensure appropriate follow up and long term care. They are all board-certified and will make sure that your primary care physician is involved in your child’s plan of care.

- AMITA Health Alexian Brothers Women & Children’s Hospital Pediatrics
- AMITA Health Alexian Brothers Medical Center Pediatrics
- Pediatric Intensive Care (AMITA Health Women & Children’s Hospital)
- Neonatal Intensive Care (AMITA Health Women & Children’s Hospital)
- Special Care Nursery (AMITA Health Elk Grove Village)
Pediatric Outpatient Services

AMITA Health Alexian Brothers Health System and our physician partners offer a wide range of specialized medical care for children at each of the acute care medical centers. If you are looking for a specialist you can call 1.855.FOR.KIDZ (1.855.367.5439) to speak with our referral coordinators to find the right physician for your child’s specific healthcare need. Our pediatric specialists are board-certified and fellowship-trained to ensure that your child gets the best care close to home. Each year we see thousands of children in our outpatient clinics. To make it easier on families, we offer convenient close-to-the-door parking, friendly staff and convenient appointments.

More Convenient Kid Care
We understand what it’s like to have a sick child. And we know that having to drive all the way downtown or to another location for care makes it that much harder. So we’ve created a place nearby for kids (and their parents) where our expert care is focused on healing and getting kids back home – where they belong.

We currently offer:
• Top pediatricians and over 60 pediatric specialists
• Child Life Specialists
• A Pediatric Intensive Care Unit (PICU)
• A special Emergency Room just for kids – CN EmergiKids®
• Center for Pediatric Brain
• Advanced imaging technologies
• The Autism Spectrum and Developmental Disorders Resource Center
• And more

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
Allergists/immunologists are highly qualified to manage immune system disorders such as allergies, asthma, inherited immunodeficiency diseases, and autoimmune diseases.

Conditions that are often treated by allergists/immunologists include:
- Allergic reactions to animals, food, and medications
- Asthma
- Eczema (atopic dermatitis)
- Hay fever (allergic rhinitis)
- Hives (urticaria)
- Immune disorders that cause frequent infections (e.g., pneumonia, thrush)
- Sinusitis

Fear, anxiety, and early developmental stage may make it difficult for a child to cooperate with necessary procedures. Failure to cooperate is likely to result in a suboptimal outcome. For patients that are very young, fearful or uncooperative, we offer a team of experienced Pediatric Anesthesiologists to provide safe and effective sedation services for patients requiring diagnostic testing.

We use gentle imaging protocols to use the lowest amount of radiation for adequate imaging based on the size of the child. We image only the indicated areas and try to use alternative diagnostic studies when possible.
• Evaluation of complex medical problems in infants and children when surgery is needed
• Planning and care for before and after surgery
• A nonthreatening environment for children in the operating room
• Pain control, if needed after surgery, either with intravenous (IV) medications or other anesthetic techniques
• Anesthesia and sedation for many procedures out of the operating room such as MRI, CT scan, and radiation therapy.

**Child Life Specialists**
• Available for sedation services
• Have tools and techniques to promote positive coping during procedure
• Miniature models of equipment and picture books are utilized to minimize patient anxiety and improve understanding of tests.
• For more information visit [AlexianBrothersHealth.org/ChildLife](http://AlexianBrothersHealth.org/ChildLife)

**Cardiology**

Ira Dubrow, MD  
Mehmet Gulecyuz, MD  
Joel Hardin, MD  
Marsha Ma, MD  
Stephen Neuberger, MD  
Michael Paul, MD  
Sarah Perkins, MD  
David Thoele, MD  
Frank Zimmerman, MD

AMITA Health Alexian Brothers Health System works with many pediatric cardiology groups. Pediatric Cardiologists treat heart problems in babies (including unborn babies), children and adolescents, including structural, functional, and rhythm (heartbeat) problems. Of all heart problems in children, congenital heart defects (those present at birth) are the most common, afflicting nearly 35,000 children each year in the United States.
Pediatric Outpatient Services
(continued)

**Cystic Fibrosis Screening Program**

**Steven Boas, MD**

Under the medical direction of Steven Boas, MD, AMITA Health Hoffman Estates is a designated screening site for cystic fibrosis.

Dr. Boas reviews all results and monitors the quality of the testing. After the child receives their sweat test, the family meets with a genetic counselor so that they have a complete understanding of cystic fibrosis.

**Dentistry**

**Gay Brodersen, DDS**
**Nicola Hill-Cordell, DDS**
**Denise Fisher, DDS**

**Michael Perper, DDS**
**Fatima Pimentel, DMD**

**Developmental Pediatrician**

**Nancy Keck, MD**

A multi-disciplinary approach that includes a complete medical and developmental evaluation for children with: cognitive delays, autism spectrum disorder, developmental disorders, and social-emotional delays.
Endocrinology
Angela Ganan Soto, MD
Priya Khanna, MD

The Pediatric Endocrinology Clinic provides comprehensive, ongoing, multidisciplinary care to children with diabetes, obesity, growth and other nutrition and endocrine issues. Newly diagnosed diabetics can be fast tracked through the insulin pump start program.

- Diabetes
- Obesity
- Growth problems
- Early or delayed puberty
- Thyroid disorders
- Low blood sugar
- Medical nutrition

Gastroenterology
James Berman, MD
Kiranmai Gorla, MD
Michelle Cho, MD
T.S. Gunasekaran, MD
Esperanza Garcia Alvarez, MD
Hector Hernandez, MD

Pediatric gastroenterology specialists treat a variety of conditions and offer a wide range of diagnostic and care including removal of intestinal polyps, control of intestinal bleeding conditions and endoscopic placement of feeding tubes.

- Abdominal pain
- Celiac disease
- Cyclic vomiting
- Feeding disorder
- GI bleeding
- Gastritis
- Pancreatobiliary disease
- Constipation
- Colitis
- Diarrhea
- Food allergies
- GI infections
- Hepatitis
- Short bowel syndrome
- Cystic fibrosis
- Crohn’s disease
- Fecal incontinence
- Failure to thrive
- Helicobacter pylori
- Malabsorption
- Vomiting

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
Genetic Services
Jeannette Israel, MD

Dr. Israel is listed as one of the top Pediatric Geneticists by Chicago Magazine. Genetic services offers comprehensive evaluations, diagnosis, and genetic counseling for individuals and families with inherited or genetic-based conditions.

- Neonatal and Pediatric Genetics
- Prenatal Genetics

Hematology/Oncology
Charles Hemenway, MD, PhD
Eugene Suh, MD

Pediatric hematologists/oncologists from Loyola University Medical Center provide inpatient and outpatient services at both AMITA Health Elk Grove Village and AMITA Health Hoffman Estates. The caring physicians provide comprehensive consultative and supportive services for children with suspected or known cancer and blood diseases.

Infectious Disease Clinic
Nour Akhras, MD

Pediatric infectious disease specialists treat a wide range of infectious and immunologic diseases such as those caused by bacteria, viruses, fungi, and parasites. Pediatric infectious disease specialists are consulted for diseases that are complicated or atypical, including:

- Illnesses that are of unclear cause, have prolonged fever, or are recurrent
- Respiratory infections
- Bone and joint infections
- Tuberculosis (TB)
- Acquired Immune Deficiency Syndrome (AIDS)
- Hepatitis
- Meningitis
Nephrology

Ken Miller, MD  Rekha Agrawal, MD

Pediatric Nephrologists specialize in the care of a wide range of conditions pertaining to the kidney, urinary tract and bladder. Common reasons to see a nephrologist include:

• Proteinuria
• Hematuria
• Chronic Kidney Disease
• Dialysis
• Kidney Stones
• Renal Insufficiency
• Nephrosis

Neurology

Hossam AbdelSalam, MD  Gaurav Yadava, MD
Abdul Mazin, MD

Our team of board-certified pediatric neurologists cares for children with a broad spectrum of neurological disorders, including treatment of headache, epilepsy, brain tumors, movement disorders, developmental delays, neuro-degenerative conditions, neuromuscular diseases, cerebral palsy and more.

See further information on Drs. AbdelSalam, Mazin and Yadava on page 18 in the section on the Center for Pediatric Brain.

Steven Abern, MD  Abrar Arshad, MD

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
Pediatric Outpatient Services (continued)

Neuropsychology

Nicole Cruz, PhD  Jill Dorflinger, PhD
Amy Davis, PhD  Ester Chin, PhD

Our pediatric neuropsychologists are licensed clinical psychologists with additional fellowship training in pediatric neuropsychology. Pediatric neuropsychology is a specialty concerned with learning and behavior in relationship to a child's brain. Services include evaluation, diagnosis and treatment planning for children between the ages of 18 months and 18 years who have cognitive impairment. A neuropsychological evaluation helps to better understand a child's functioning in areas such as memory, attention, perception, coordination, language and personality. Additionally neuropsychology is a critical piece of epilepsy patient diagnosis and treatment.

See further information on Drs. Davis, Dorflinger, Cruz and Chin on page 20 in the section on the Center for Pediatric Brain.

Neurosurgery

Bryan Bertoglio, MD

Dr. Bertoglio received his fellowship training in pediatric neurosurgery from The Royal Children's Hospital in Melbourne, Australia. He has expertise in pediatric neurosurgical care along with extensive training in microsurgical, endoscopic, and stereotactic techniques, providing advanced treatment for pediatric patients.

See further information on Dr. Bertoglio on page 19 in the section on the Center for Pediatric Brain.

Neuro-ophthalmology

Patricia Davis, MD

As your child’s vision system develops, neurological complications may contribute to problems with sight and eye function. Neuro-ophthalmology is a subspecialty of neurology and ophthalmology, offering expertise in the functioning of the eye and the muscles and nerves that control the eye.
Nutrition Services
Our team consists of dietitians, nurses and certified diabetic educators that can develop a customized plan for each patient. We provide excellent feedback and reporting to the referring physicians.

- Failure to thrive
- Food allergies
- Gluten-free diet
- Poor weight gain/growth
- Cystic fibrosis
- Autism meal planning
- Transitional feeding
- Feeding intolerances
- Diabetes
- General nutritional planning
- Weight management
- Premature check-in

Ophthalmology
Kimberlee Curnyn, MD  Deborah Fishman, MD
Ceressa Longest, MD  Lisa Verderber, MD

Comprehensive ophthalmology services with expertise in all subspecialties including consultation, diagnosis, therapeutic care and surgical procedures performed by highly experienced ophthalmologists (Eye MD’s) that are board-certified and fellowship-trained to treat pediatric patients.

Orthopedics
Ciro Cirrincione, MD  Albert Knuth, MD
Bruce Goldberg, MD  Richard Rabinowitz, MD
Carl Graf III, MD  Todd Simmons, MD

A pediatric orthopedist will evaluate and treat bone, joint or muscle problems in a child who is still growing.

Otolaryngology / Ear Nose and Throat
Marci Pugnale, MD  Maria Wittkopf, MD

A pediatric ENT will provide diagnosis, management, and treatment of diseases and disorders of the ear, nose, throat (ENT) and related structures of the head and neck, including the sinuses, larynx (voice box), oral cavity, and upper pharynx (mouth and throat).

For all of your pediatric needs: 1.855.FOR.KIDZ (1.855.367.5439)
Pediatric Outpatient Services
(continued)

**Pulmonology**

Deepak Jajoo, MD  Steven Boas, MD

The evaluation and treatment of breathing and lung diseases such as chronic cough, difficulty breathing, recurring pneumonia, asthma, cystic fibrosis, and apnea.

**Plastic Surgery**

Renee Burke, MD

Dr. Burke received her fellowship training in pediatric plastic surgery at the Vanderbilt School of Medicine and the Children’s Hospital of Miami. Dr. Burke is specially trained in surgery for infants, children and adolescents.

She is very experienced in treating a multitude of medical conditions, from those impairing function to appearance-related conditions with psychological effects.

**Sleep Medicine**

Sleep disorders in children can occur at any age and affect the entire family. Well rested children function better and are less prone to behavioral problems.

If you suspect that your child has a sleep problem, discuss your concerns with your healthcare provider. Treatment options may include a direct referral to the sleep lab or referral to a specialist for further evaluation.
**Surgery, Craniofacial**

**Russell R. Reid, MD, PhD**

Dr. Reid is a fellowship-trained pediatric craniofacial/maxillofacial (head and face) surgeon. His practice focuses on surgical care for infants, children and adolescents with congenital (since birth) and acquired facial abnormalities. Dr. Reid received his fellowship training at the Children’s Hospital of Philadelphia (CHOP/University of Pennsylvania) where he specialized in the care of children with facial and skull abnormalities, and the repair of cleft lip and palate.

**Surgery**

Surgical consultation and evaluation provided by board-certified Pediatric Surgeons:

- Robert Arensman, MD
- Srikumar Pillai, MD
- Bill Chiu, MD
- Connie Rossini, MD
- Justin Lee, MD
- Ami Shah, MD
- Jateen Patel, MD

Our dedicated team of Pediatric Surgeons provide inpatient consultation and weekly clinics for assessment and consultation.

**Urology**

**Bruce Lindgren, MD**

Pediatric Urologists specialize in the care of children and adolescents with urologic problems. Fortunately, there are numerous treatment options, both medical and surgical, to help these children:

- Urinary tract infections
- Potty training problems
- Antenatal hydronephrosis/pelviectasis
- Hypospadias
- Day and/or night-time wetting
- Vesical Ureteral Reflux (VUR)
- Undescended testicle
- Bladder infections

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
AMITA Health Alexian Brothers Center for Pediatric Brain

AMITA Health Alexian Brothers Center for Pediatric Brain offers a comprehensive and coordinated approach for the treatment of brain, nervous system and neuromuscular disorders.

Our specialty programs and clinics feature physicians, psychiatrists, psychologists, nurses, navigators and other neuroscience professionals who diagnose and treat patients in a supportive, family friendly environment.

AMITA Health Alexian Brothers Center for Pediatric Brain has been made possible through a generous gift from the Foglia Family Foundation.

We are located on the campus of AMITA Health St. Alexius Medical Center, Hoffman Estates in the AMITA Health Women & Children’s Hospital at: 1555 Barrington Rd., First Floor, Hoffman Estates, IL 60169.

Providers

Neurology

Hossam AbdelSalam, MD
Gaurav Yadava, MD
Abdul Mazin, MD

Dr. AbdelSalam, Medical Director of Child & Adolescent Neurology, AMITA Health Alexian Pediatric Specialty Group, received his fellowship training at the Cleveland Clinic Foundation, Cleveland, OH. In addition to general neurology, he has a particular interest and has done research in the field of pediatric headache. Dr. AbdelSalam is board-certified in pediatrics, pediatric neurology and pediatric headache medicine.

Dr. Yadava received his fellowship training at the Comer Children’s Hospital at the University of Chicago. In addition to general neurology, he has a special interest in Behavioral and Developmental Neurology; autism spectrum disorders, ADHD, learning disability and developmental delays.

AMITAHHealth.org/Pediatrics
Dr. Mazin is our Pediatric Epilepsy Site Medical Director. He is board-certified in pediatric neurology and epilepsy. Dr. Mazin received his pediatric training at the University of Chicago and completed his neurology/pediatric residency at the Floating Hospital for Children at Tufts - New England Medical Center, Boston, MA. Dr. Mazin was also a Clinical fellow in Epilepsy and Neurophysiology at the Children’s Hospital Boston affiliated with Harvard University.

Our pediatric neurologists are available for urgent phone consults.

Clinical Practice:
- Headache
- Cerebral palsy
- Movement disorders
- Trauma
- Epilepsy
- Autism, ADHD and developmental disabilities
- Stroke
- Neuro-metabolic diseases

Neurosurgery

Bryan Bertoglio, MD

Dr. Bertoglio received his fellowship training in pediatric neurosurgery from The Royal Children’s Hospital in Melbourne, Australia. Dr. Bertoglio is part of AMITA Health Alexian Brothers Neurosciences Institute and Neurosurgical Associates. He has expertise in pediatric neurosurgical care along with extensive training in microsurgical, endoscopic, and stereotactic techniques, providing advanced treatment for pediatric patients.

Clinical Practice:
- Endoscopic and open craniosynostosis surgery
- Craniofacial anomalies
- Vascular malformations
- Craniocervical junction abnormalities
- Endoscopic treatment of hydrocephalus and arachnoid cysts
- Brain and spine tumors
- Congenital brain and spine abnormalities

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
AMITA Health Alexian Brothers Center for Pediatric Brain (continued)

- Chiari malformations and syringomyelia
- Neurofibromatosis, tuberous sclerosis and other genetic disorders
- Traumatic brain and spine injuries

Neuropsychology
Amy Davis, PhD
Jill Dorflinger, PhD
Nicole Cruz, PhD
Ester Chin, PhD

Our pediatric neuropsychologists are licensed clinical psychologists with additional fellowship training in pediatric neuropsychology. Pediatric neuropsychology is a specialty concerned with learning and behavior in relationship to a child’s brain. Services include evaluation, diagnosis and treatment planning for children between the ages of 18 months and 18 years who have cognitive impairment.

A neuropsychological evaluation helps to better understand a child’s functioning in areas such as memory, attention, perception, coordination, language and personality. This evaluation also plays a critical role in the diagnosis and treatment of epilepsy.

Children are typically referred because of one or more problems:
- Learning disabilities and Attention Deficit Hyperactivity Disorder (ADHD)
- Psychiatric disorders (e.g. depression, anxiety, bipolar, autism spectrum disorders)
- Genetic disorders
- Epilepsy
- Brain tumors and/or cancer
- Traumatic brain injury including concussion
- Neurosurgical intervention
Psychiatry and Counseling
Our Multidisciplinary Clinics are supported by psychiatric and counseling services from AMITA Health Alexian Brothers Behavioral Health Hospital, Hoffman Estates.

Developmental Pediatrics
Nancy Keck, MD
A multi-disciplinary approach that includes a complete medical and developmental evaluation for children with cognitive disabilities, autism spectrum disorders, developmental disorders, and social-emotional delays.

Medical Diagnostics
Complete medical, developmental, and behavioral evaluation. Common conditions diagnosed in this clinic include: autism, communication disorders, specific or global developmental delays, and cerebral palsy. Evaluations include assessment of motor development, and screening for feeding, speech-language, and social development.

Down Syndrome Clinic
Complete medical evaluation by a developmental pediatrician that specializes in patients with Down syndrome. Assessment of motor development and screening for feeding, speech-language, and social development.
Our genetics team coordinates diagnostic testing, treatment, and ongoing care for children and adolescents with neurogenetic conditions. Neurogenetic conditions can present in a variety of ways including developmental delay, seizures, abnormal muscle tone or movements, or other effects on the nervous system. Conditions commonly treated through the program include:

- Angelman Syndrome
- Ataxias
- Brain Malformation Disorders
- Cerebral folate deficiency
- Familial Autism
- Familial Epilepsy
- Fragile X Syndrome
- Hypotonia
- Leukodystrophies
- Mental Retardation
- Migrational Diseases
- Mitochondrial Disorders
- Neurogenic Disorders
- Neuronal Migration Disorders
- Neurotransmitter Disorders
- Rett Syndrome
Programs

Epilepsy Center

Michael C. Smith, MD, Medical Director,
AMITA Health Alexian Brothers Neurosciences Institute, Epilepsy Center

Abdul Mazin, MD, Site Medical Director, Pediatrics

AMITA Health Alexian Brothers Health System is a designated Level III Epilepsy Center by the National Association of Epilepsy Centers. Under the medical direction of Michael Smith, MD, the program brings together experts from the AMITA Health Women & Children’s Hospital, AMITA Health Alexian Brothers Neurosciences Institute and our program partners, Rush University Medical Center and the Epilepsy Foundation of Greater Chicago, to diagnose and treat some of the most challenging epilepsy cases.

Epilepsy Monitoring Unit (EMU)
The epilepsy monitoring unit is dedicated to pediatric patients. During overnight stays, patients are monitored using electroencephalography (EEG) technology. The non-invasive method uses multiple electrodes attached to the scalp to record the brain's electrical activity. The video captures activity and sound recording of each patient. This gives the specialists the ability to identify seizure activity and plan the best possible treatment which can include medication or surgical intervention.

Ketogenic Diet
The ketogenic diet is a high fat, high protein, low carb diet that is used as a treatment option for children with difficult to control epilepsy. It can be effective in decreasing seizure activity and aiding in the medication management of patients. This is a multidisciplinary clinic staffed with a neurologist, dietician, and social worker.

Vagus Nerve Stimulation
Vagus nerve stimulation (VNS) involves implanting a pacemaker-like device that generates pulses of electricity to stimulate the vagus nerve.

VNS therapy can help to stop a seizure in progress or reduce the severity of the seizure.

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
Concussion Clinic

Concussion is increasingly recognized as a health concern among children, particularly young athletes. Concussion (or mild head trauma) can present in many different ways, and as a result may be difficult to detect. A child can sustain a concussion even if he or she did not lose consciousness, and the effects of concussion are often not visible on CT scans. We offer a same day multidisciplinary evaluation where patients first see a fellowship-trained neuropsychologist followed by a board-certified pediatric neurologist at our family friendly clinics.

Neuropsychology Evaluation
- Thorough assessment of cognitive status
- Assessment of psychological functioning
- Education for parents and family regarding concussion

Neurology Exam
- Complete neurological examination including strength, balance, coordination and reflexes
- Neuro-imaging and pharmacologic treatment

Rapid Results
- Available to the referring physician within 24 hours after the assessment is completed
- Recommendations for ongoing management and timeline for return to school, sports and regular activities

Speakers Available
Our Concussion experts are available to speak to parent groups, schools, sport associations or park districts about concussion warning signs and symptoms and return to play guidelines.
Headache Center
AMITA Health Alexian Brothers Women & Children’s Hospital Pediatric Headache Center, led by Director, Dr. Hossam AbdelSalam, provides a multidisciplinary approach to care for children and adolescents with headaches, including migraine, tension, cluster and headaches caused by medical disorders.

The medical team crafts a personalized care plan that can include the services of child psychology, nursing, and nutritional counseling to evaluate and treat your child. This collaborative approach to care combines a number of effective treatments:

• Lifestyle changes with possible removal of triggers
• Behavioral coping skills
• Abortive and preventive medications
• Chemo-denervation “Botox”

Multidisciplinary care has improved outcomes because it focuses on many levels of headache management, including medications, teaching new coping skills and educating the patient about the treatment plan.

Neonatal Developmental Follow-Up Clinic
Babies born prematurely may be followed up by the neonatologists for up to one year to monitor for any sign of developmental or medical delays. Babies receive a complete medical evaluation and are seen by a team that includes occupational, speech and developmental therapists. The team collaborates with your primary care physician to make sure that your baby gets a great start in life.
AMITA Health Alexian Brothers Center for Pediatric Brain (continued)

Autism Spectrum & Developmental Disorders Resource Center
Maria Bellantuono, LPC, Director

AMITA Health Alexian Brothers Health System Autism Spectrum & Developmental Disorders Resource Center is a free service offered to our community and is the starting point for families with children that have special needs. Our specially trained clinical navigator helps families find the right diagnostic evaluations to create a personalized blueprint of care for children through adults who are experiencing developmental or behavioral problems.

Clinical Practice:
• Apraxia
• Attention Deficit Hyperactivity Disorder (ADHD)
• Autism
• Down syndrome
• Early childhood trauma
• Learning disabilities
• Mental retardation

Autism Transition Partners
Making Health Care Visits Less Stressful
It can be difficult for children with autism spectrum disorders (ASD) to understand and cope with healthcare visits. The Child Life team specializes in making the healthcare experience easier and less stressful for patients and families.
Services

Advanced Neuro-Diagnostics
Patients have access to state-of-the-art diagnostic tools:

Magnetoencephalography
The MEG at the Illinois MEG Center within AMITA Health Alexian Brothers Neurosciences Institute is used to localize the source of abnormal brain activity, which may be the source of seizures.

Magnetic Resonance Imaging
Our 3T MRI has customized epilepsy protocols that produce a remarkably accurate, high-quality image of the brain’s structure to help identify structural abnormalities that may be causing seizures. This is supported by our pediatric anesthesia team.

Ambulatory EEG Services
(In-Home Monitoring)
Electroencephalogram (EEG) monitoring system that records brain waves for one or more days in the comfort of a patient’s home.

Sleep Center
Sleep problems may be seen in 25 to 30 percent of infants and children at some point in their lives and become chronic if left undiagnosed or treated. Our pediatric Sleep Center is specially designed and staffed for comfortable overnight stays. Our dedicated team ensures that the patient and family are cared for in a homelike setting.
Sedation Services

Niekoo Abbasian, MD  
Maribel Galiano-Goll, MD  
Casey Shupe, MD

Fear, anxiety, and early developmental stage may make it difficult for a child to cooperate with necessary procedures. Failure to cooperate is likely to result in a suboptimal outcome. For patients that are very young, fearful or uncooperative, we offer a team of experienced Pediatric Anesthesiologists to provide safe and effective sedation services for patients requiring diagnostic testing. A history and physical within 30 days of testing is required.

To Schedule a Pediatric Sedation at AMITA Health St. Alexius Medical Center, Hoffman Estates:

- Call Int. Radiology 847.755.8413
- FAX Orders to 847.755.3282
- For MRI tests, please specify if sedation is indicated.

We use Gentle Imaging protocols to use the lowest amount of radiation for adequate imaging based on the size of the child. We image only the indicated areas and try to use alternative diagnostic studies when possible.

Child Life Specialists

Child Life Specialists are professional members of the healthcare team that strive to reduce the stress associated with healthcare experiences and enables children and families to cope in a positive manner. By using age-appropriate education, activities, and play, we minimize stress and encourage coping in children and families.
Support Services

AMITA Health Alexian Brothers Behavioral Health Hospital, Hoffman Estates

As part of our multidisciplinary approach, we offer short-term psychiatry and counseling services provided by AMITA Health Behavioral Health Hospital. The hospital is the 7th largest behavioral health hospital in the nation. It is recognized for its specialized programs for children.

Eating Disorders Program
Our nationally-recognized Eating Disorders Program provides comprehensive care for those who are struggling with anorexia nervosa, bulimia, compulsive overeating, and binge eating.

School Refusal and Anxiety Program
The goal of the program is the successful reintegration of children and adolescents to school who use avoidance as a primary means of coping with stress.

Self-Injury Recovery Services (SIRS)
Self-Injury Recovery Services focuses on developing vital coping skills to manage the patient’s emotions and help them to overcome unhealthy behaviors that result in self-injury.

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
Community Partners

One of the core values of AMITA Health Alexian Brothers Health System is partnership.

Our community partners in care make it possible for us to provide all encompassing support to our patients and their families.
AMITA Health Alexian Brothers Pediatric Endocrinology Clinic

**AMITA Health Alexian Brothers Women & Children’s Hospital Pediatric Outpatient Center, Elk Grove Village**

1555 Barrington Rd.
Hoffman Estates, IL 60169

**Angela Ganan Soto, MD**
**Priya Khanna, MD**

Dr. Ganan Soto is a pediatric endocrinologist dedicated to providing exceptional care for children. As part of a multidisciplinary team of nurses, educator and dieticians, Dr. Ganan Soto works with patients and families to develop a customized treatment plan that meets each child's unique needs. She also speaks Spanish and is accepting new patients in two convenient locations.

Dr. Khanna is a board certified Pediatric Endocrinologist. She completed her residency in pediatrics at the University of Illinois Hospital in Chicago. She completed her fellowship in pediatric endocrinology at the Medical College of Wisconsin in Milwaukee. She has been in practice in the Chicago area for over 3 years.

**Team Approach**
The Pediatric Endocrinology Clinic provides comprehensive, ongoing, multidisciplinary care to children with diabetes, obesity, growth and other nutrition and endocrine issues. Staff consisting of skilled nurses, certified diabetes educators and nutritionists provide care for patients with:

- Diabetes
- Early or delayed puberty
- Growth concerns
- Weight management concerns
- Thyroid gland problems
- Medical nutrition
- Other hormone imbalance syndromes

For all of your pediatric needs:
1.855.FOR.KIDZ (1.855.367.5439)
Growth Hormone Concerns
Thorough examination and workup for children who are experiencing delays in growth due to issues such as small for gestational age, delayed bone age and short stature. The clinic offers multiple medical and nutritional approaches in treatment.

Early Puberty
Our Pediatric Endocrinology Clinic uses the most current methods of therapy for precocious puberty including the use of implants to replace monthly injections for early puberty in some patients.

Pediatric Weight Management Program
The Pediatric Weight Management Program is a comprehensive nutrition, physical activity and support program designed with the entire family in mind. Our team of health professionals will help your family identify realistic goals for making positive lifestyle changes. We look forward to helping you and your family become healthier now and for the rest of your lives.

Research
We have recently become an affiliate site for Type 1 Diabetes TrialNet. We are participating in the Pathway to Prevention Study, which provides screening tests for relatives of patients with type 1 diabetes for assessment of autoantibodies (screening phase). Those who test positive for the antibodies are eligible to enter the monitoring phase to estimate their risk for developing type 1 diabetes.
AMITA Health Alexian Brothers Behavioral Health Hospital, Hoffman Estates & Services

AMITA Health Alexian Brothers Behavioral Health Hospital,
Hoffman Estates
1650 Moon Lake Blvd.
Hoffman Estates, IL 60169

At AMITA Health Behavioral Health Hospital, we offer comprehensive behavioral health services, from prevention and early intervention to treatment and aftercare. Our mission is to help individuals of all ages learn practical ways to manage mental health and substance abuse problems. When life hurts, call us, we can help.

One call is all it takes to access any of the services provided by AMITA Health Behavioral Health Hospital. Trained counselors take calls 24 hours a day, 7 days a week. Appointments are made immediately and walk-in appointments are welcome.

**Youth Inpatient Program**
Our Youth Inpatient Program provides a therapeutic environment for teens between the ages of 12 and 18 who are battling emotional issues.

**Adolescent Partial Hospitalization & Adolescent Intensive Outpatient Program**
Our partial and intensive outpatient programs for adolescents treat a wide range of emotional issues to help adolescents cope effectively and make healthy life choices.

**Child Partial Hospital Program**
The Child Partial Hospital Program offers specialized care to help children between the ages of 6 and 12 develop healthy social skills and problem solving strategies.

**Child & Adolescent Anxiety Disorders Program**
The Child & Adolescent Anxiety Disorders Program offers a comprehensive treatment approach to managing and relieving anxiety in children and adolescents and equipping families with necessary maintenance skills.
